GUIDE MAP

CITY TOUR/ ADDIS ABEBA

TOUR NORTHERN ETHIOPIA

THE NORTHERN PART OF ETHIOPIA

The Northern part of Ethiopia is what we call the "Historic North" or the Cultural Route. On this stretch of the country are found many of the famous touristic sight like to Blue Nile Gorge, the "Tis Isat " or smoking water of the Nile Falls and Bahirdar town by the Lake Tana with its 12th -15th century Island Monasteries.

TOUR SOUTHERN ETHIOPIA

THE SOUTHERN PART OF ETHIOPIA

In a huge contrast to the North, the Ethnic South is a disappearing world worth seeing before it vanishes and is absorbed by 'modern civilization". The beautiful culture and way of life of the konsoes, Hamers, Benas, Gelebs, Karos, Mursis and all the other tribes, will disappear in a short while due to the urban way of life and encroachment of Christianity and other religions. This is the time to see this fast disappearing world of 'stone age' in the 21st century, before it is too late.

TOUR EASTERN ETHIOPIA

THE EASTERN PART OF ETHIOPIA

The East of Ethiopia which comprises of the Bale Mountains, Harar and Dire Dawa is an entirely different world from that we see in the North, South and West. This is a predominantly Muslim culture. In fact Harar is the 4th holy place of Islam.

The Bale Mountains- similar to the semien in many ways - is a real highland wilderness. Horse trekking and fishing in the alpine lakes is a popular pass time in this part. The unique vegetation, many species of endemic birdlife and the endemic mammals like Red Fox and Mountain Nyala makes Bale a true adventure and recreational place to see. Last but not least, the Danakil - a sea of molten lava- is the lowest and hottest place on earth. Going down there and trekking by camel is a true adventure one can have only once in a life time.

TOUR WESTERN ETHIOPIA

THE WESTERN PART OF ETHIOPIA

The west of Ethiopia is a vast area of dense forest where there are tribes as endemic as those of the South Omo. Tribes such as the Mezenger, surma Agnuwak, and many others inhabit the west and south west all the way to the Sudanese boarder.

On the other side of Gibe, some 330 Kms, from Addis, we come to Jima, the biggest town in the West with a lot of history including the palace of Aba Jifar, the founder of Jima town. From Jima onwards we pass through dense forest and go all the way to Agaro, Badele, Metu and Gore towns known for their coffee and tea plantations. The province of keffa, which is said to be the source of coffee, is an area worth visiting for its coffee culture. Surma Young Boy.
